1 DEEPLY DISTURBED by the recent and growing violence in Hong Kong, where protesters,
2 policemen and soldiers have been fighting against each other in a dangerous confrontation,
3 caused by the struggle for Hong Kong's sovereignty, and

4 GRIEVED by a bill passed in July passed by the Chinese government which was
5 discriminatory towards the citizens of Hong Kong, that made it so criminals in Hong Kong
6 could be put on trial in China, however

7
8 EMPHASIZING the lack of safety of the protesters in recent events caused by a law banning
9 makes during a protest, while police still uses harmful chemical weapons, which has caused
10 many injuries to occur, at the same time

11
12 AWARE that Hong Kong is not a true sovereign state but rather special case of sovereignty
13 where China lets Hong Kong have some freedoms and powers granted by the Chinese
14 government, and

15
16 ANXIOUS on instability of the peaceful protests that can turn violent fairly quickly resulting
17 dangerous climate for Hong Kong's citizens;

- 18
19
20 1) CALLS UPON UN peacekeepers to help diffuse the ongoing and worsening protests
21 that occurred in Hong Kong, and eliminate the destructive armed forces;
- 22
23 2) REQUEST China and Hong Kong have peace talks about Hong Kong's citizens rights
24 and the city finally becoming not just a special case rather a sovereign country of its
25 own;
26 a) Any and all nations that wish to help with the peace talks or diffusing protests
27 as long as Hong Kong and China unanimously give permission for the nations
28 to do so,
29 b) The nations are respectful and do not over step their boundaries while assisting
30 China and Hong Kong with the issue;
- 31
32 3) STRESSES the urgency of diffusing the situation because of the rapidly growing
33 violence in the streets resulting in many injuries and destruction of the city of Hong
34 Kong;
- 35
36 4) EXPRESSES HOPE that Hong Kong and China accept the help that has been
37 offered and work together to find a balance while letting Hong Kong be its own
38 nation.
