

Do Not Overload the Washers & Dryers

Your clothing needs to be able to move freely to clean properly.

- Pile clothes loosely in washer, leaving about 5" of space from the top
- 1 wash load = 1 dry load
- **DO NOT** wash or dry comforters or large bulky items in these machines

- If clothing is overloaded and clothing can't move freely, the load will not be able to wash or dry effectively and clothing can be damaged
